

# Configuring WAY4™ According to Diners Club Requirements (April 2018)

# Contents

INTRODUCTION	1
CHAPTER 1. DINERS CLUB SETTINGS	2

# Introduction

This document describes how WAY4™ must be configured to conform to Diners Club requirements set forth in Release 18.1 documents.

## Chapter 1. Diners Club Settings

To comply with Diners Club requirements, WAY4 version 03.45.30.51 or the newer version 03.45.30.XX, if version 03.45.30 is used must be installed at the bank or processing centre. If the bank or processing centre uses WAY4 version 03.46.30, version 03.46.30.05 or higher must be installed.

These payment system requirements are supported by Transaction Switch platform version 1.1.267-1697 or higher.

The payment system will notify banks of the date and time when the new requirements become effective.

### Transaction Switch Settings

To meet the requirements of the sections "Functional Enhancements" and "Documentation Enhancements" of the document "Xpress Transaction Manual. Release 18.1" (Xpress Transaction Manual (10.13.2017) R18.1 Final.pdf), change the "resource" parameter value in the "dialect" section of the DCIXPRESS.s.xml configuration file from "dcixpres.prm" to "dcixpresR18.prm":

```
<dialect resource="dcixpresR18.prm" defaultCoding="ASC"
messageCoding="ASC"/>
```

The date of changing this parameter value must be agreed with the payment system.
