

# Configuring WAY4™ According to UnionPay International Requirements (October 2017)

# Contents

INTRODUCTION	1
CHAPTER 1. UNIONPAY INTERNATIONAL SETTINGS	2
Redefining Currency Parameters	2
Global Parameter Settings	2

## Introduction

This document describes how WAY4™ must be configured to comply with UnionPay International requirements set forth in the document "Implementation Guide For Technical Enhancement. Version 17.2" ("Implementation Guide for Technical Enhancements-17.2.pdf"), effective from October 2017.

## Chapter 1. UnionPay International Settings

To comply with UnionPay International requirements, WAY4 version 03.44.30.56 or the newer version 03.44.30.XX, if version 03.44.30 is used must be installed at the bank or processing centre. If the bank or processing centre uses WAY4 version 03.45.30, version 03.45.30.04 or higher must be installed.

These payment system requirements are supported by NetServer version 6.1.259 or higher and Transaction Switch version 1.1.241-406 or higher.

The payment system will notify banks of the date and time when the new requirements become effective.

### Redefining Currency Parameters

To meet the requirements of the section "2.6 Changes the Number of Minor Units for Iceland Krona" of the document "Implementation Guide For Technical Enhancements. Version 17.2" (Implementation Guide for Technical Enhancements-17.2.pdf), specify the required value for the CUP\_RELEASE global parameter (see "Global Parameter Settings), and make the settings described in the section "Redefining Currency Parameters" of the document "Currency Conversion".

### Global Parameter Settings

To comply with payment system requirements, the global parameter CUP\_RELEASE must be assigned the value "17.2". The new value must be assigned to the parameter before importing/exporting files pursuant to the new requirements.
