Configuring Global Parameters	2

Introduction

This document describes how WAY4™ must be configured to comply with AMEX American Express Global Network Services (AEGNS) requirements set forth in Release 17.2 documents.

Chapter 1. AMEX Settings

To comply with AMEX requirements, WAY4 version 03.44.30.57 or the newer version 03.44.30.XX, if version 03.44.30 is used must be installed at the bank or processing centre. If the bank or processing centre uses WAY4 version 03.45.30, version 03.45.30.04 or higher must be installed.

These payment system requirements are supported by NetServer version 6.1.259 or higher and Transaction Switch version 1.1.241-406 or higher.

The payment system will notify banks of the date and time when the new requirements become effective.

Redefining Currency Parameters

To meet the requirements of the section "Icelandic Krona and Uganda Shilling Currency Decimalization Change" of the document "Policy and Technical Release Announcement. April 2017" (Policy and Technical Release Announcement - April 2017.pdf), specify the required value for the AMEX_RELEASE global parameter (see Configuring Global Parameters), and make the settings described in the section "Redefining Currency Parameters" of the document "Currency Conversion".

Configuring Global Parameters

To comply with AMEX requirements, the value "17.2" must be assigned to the AMEX_RELEASE global parameter. The new value must be assigned to the parameter before importing/exporting files pursuant to the new requirements
