Configuring WAY4™ According to UnionPay Requirements (October 2015)

Contents

Introduction

This document describes how WAY4™ must be configured to conform to UnionPay requirements set forth in the document "Implementation Guide For Technical Enhancement October 2015" ("Implementation Guide for Technical Specification.pdf") becoming effective in October 2015.

Chapter 1. UnionPay Settings

To comply with UnionPay requirements, WAY4 version 03.40.30.59 or the newer version 03.40.30.XX, if version 03.40.30 is used must be installed at the bank or processing centre. If the bank or processing centre uses WAY4 version 03.41.30, version 03.41.30(.00) or higher must be installed.

Banks will be notified by the payment system about the date and time the new requirements become effective.

Configuring Global Parameters

To meet payment system requirements, the value of the global parameter CUP_RELEASE must be set to "15.2". The new value must be assigned to the parameter before importing/exporting files pursuant to the new requirements.
