Configuring WAY4™ According to JCB Requirements (October 2017)

Contents

Introduction

This document describes how WAY4™ must be configured to comply with JCB requirements set forth in Release 17.2 documents.

Chapter 1. JCB Settings

To comply with JCB requirements, WAY4 version 03.44.30.46 or the newer version 03.44.30.XX if version 03.44.30 is used must be installed at the bank or processing centre. If the bank or processing centre uses WAY4 version 03.45.30, version 03.45.30(.00) or higher must be installed.

These payment system requirements are supported by NetServer version 6.1.259 or higher and Transaction Switch version 1.1.240-395 or higher.

The payment system will notify banks of the date and time when the new requirements become effective.
